Agenda : Letters Arrangement

Q.11 How many different words can be formed from the letters of the word GANESHPURI when:

~~(A)~~ All the letters are taken. (= No condition.)

~~(B)~~ The letter G always occupies the first place.

(C) The letters P and E respectively occupy the first and last places.

(D) All the vowels are always together.

(E) How many words of 5 letters each can be formed each containing 3 consonants and 2 vowels?

(F) All the vowels are never together.

(G) No 2 vowels are together.

G A N I E S H P U R I

# Agenda : Team Formation

**Q.12** How many committees of 5 members each can be formed from 8 official and 4 non-official members in the following cases :

- (A) Each consisting of 3 official and 2 nonofficial members.**
- (B) Each contains at least two non-official members.**
- (C) Each consisting of at most two official members.**
- (D) A particular official member is always included.**
- (E) A particular non-official member is never included.**

**Q.13** Out of 8 men and 10 women a committee consisting of 6 men and 5 women is to be formed. How many such committees can be formed when one particular man A refuses to be a member of the committee is which his boss B's wife is there?

**Q.15** A three-member committee has to be formed a group of 9 people. How many such distinct committees can be formed?

(A) 27

(B) 72

(C) 81

(D) 84

[GATE 2018 : IIT Guwahati (CE Set – 2)]

**Q.16** An e-mail password must contain three characters. The password has to contain one numeral from 0 to 9, one upper and one lower case character from the English alphabet. How many distinct passwords are possible?

(A) 6,760

(B) 13,520

(C) 40,560

(D) 1,05,456

**[GATE 2018 : IIT Guwahati (EE Set – 1)]**
